Passionate  
Cutting!

NEW

## CAST-LINE

### The expert in castings

especially for sawing  
jobs in non-ferrous  
foundries

- Carbide tipped band saw blade with positive rake angle for rapid cuts and easy feeding
- Wide tooth setting prevents jamming in the cutting channel

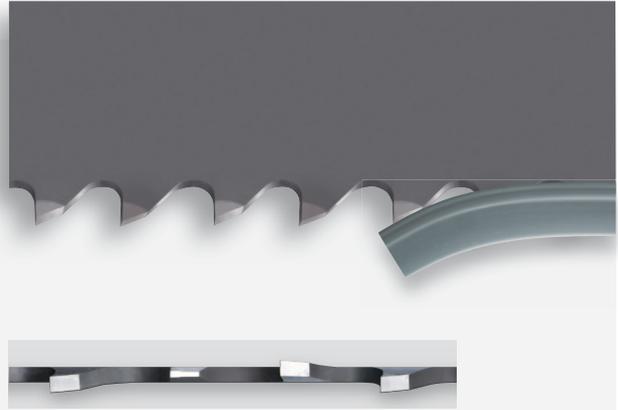

Band Saw Blades from ARNTZ are high-performance tools – perfectly made for the specific application, reliable and economical. The new article group 662 is our saw expert for castings made out of aluminum and bronze.

**Article Group 662**

# CAST-LINE

The expert in castings especially for sawing jobs in non-ferrous foundries.
